### **Dr. Harry A. Long Earns Certification as a Premier Invisalign® Provider**

Wayne, New Jersey – February 15, 2008 – **Dr. Harry A. Long, with offices in Wayne**, was recently recognized as a Premier Provider of **Invisalign**, the invisible method of straightening teeth without wires and brackets. This is an honor shared by only the top 3% of all dentists trained to provide Invisalign care in the United States. This recognition was accomplished through the completion of both coursework and successful case completions.

Invisalign combines the doctor's clinical expertise with proprietary 3-D software to make a series of almost invisible, removable Aligners that move teeth in precise increments according to the doctor's treatment plan. Doctors must attend clinical workshops before they can prescribe Invisalign. The workshops focus on clinical principles and successful treatment techniques, as well as Invisalign's unique software and manufacturing process.

"I've seen the great comprehensive and cosmetic results my patients are enjoying with Invisalign, and I'm excited to be offering my patients this popular treatment option," said Dr. Long. "We want to provide patients with, not only the most advanced treatment possible, but also a range of options that fit their lifestyles and their unique needs."

Dr. Long has been practicing cosmetic and restorative dentistry for more than twenty years, and now finds that Invisalign is a significant treatment option for those who want to improve both cosmetics and function. Dr. Long was recognized as the recipient of The Cosmetic Practice of the Year Award and is a frequent contributor to many national dental publications.. To learn more about Invisalign or to schedule a consultation, please call Dr. Long at (973) 694-5101 or visit [www.drharrylong.com](http://www.drharrylong.com)
